

# QUIETKAT

## Jeep Full Suspension

V.P.O.

**Price: \$4999.99**

### Awarded the #1 All-Terrain Electric Bike by Electric Bike Report

The Jeep® E-Bike features an advanced, torque-sensor motor system that delivers 1000W nominal 1550W peak of unmatched power and a massive swappable battery with enough range to conquer epic backcountry adventures.

**All Jeeps in Martins stock have updated 6 Blade Battery and VPO controller!**

### Key Features

**Backed by Jeep®:** Inspired by the legendary off-road capability of the Jeep line of SUVs, the Jeep® E-Bike is the most capable electric bike on the planet, ready for any terrain.

**VPO™ Technology:** 1000w mid-drive motor with Variable Power Output Technology allows you to select between Class 1, Class 2, Class 3, and Unlimited Modes.

**Torque sensor:** Matches the amount of pedal assist needed with your natural power output resulting in more range and a smoother ride, or select Cadence Sensor in the settings for more consistent power output.

**Precise stopping power:** Fitted with high-quality, four-piston hydraulic disc brakes for maximum control and heat dissipation.

**All-terrain tires:** CST 26"x4.8" fat tires are some of the largest on the market; tackle a variety of technical, off-road terrain. Similar to your Jeep vehicle the tires can be aired down for maximum traction in soft sand and snow and aired up for hardpack terrains such as rocks and roots.

**Versatility:** Easily conquer off-road terrain including soft sand and snow, hardpack trails, and rocks.

**Rider flexibility:** Suitable for all types of riders and available in 17 or 19-inch frame sizes with an adjustable seat post.

**Heavy-duty:** Designed to carry heavy cargo, with a 300-pound load capacity for transporting gear. Ideal for hunters or overlanders.

**No range anxiety:** Capable of going long distances with just a single charge on a powerful motor.

**Multiple wheel sizes available:** Ability to switch to a 29" standard mountain bike tire set for even more flexibility.

**Flexible modes:** Eco, Sport, Throttle, Walk

**Premium support:** The best customer service in the industry with USA-based reps standing by.

**109 Point Inspection:** An industry-leading quality assurance inspection ensures every last bolt and connection is checked before it arrives. Period.
